PROFESSIONAL SUMMARY

Results-driven data analyst with hands-on experience in SQL, Python (Pandas, NumPy), Power BI, and Excel. Skilled in end-to-end data workflows — from data cleaning and ETL processes to dashboard development and business intelligence reporting. Proven ability to translate complex datasets into actionable insights that support data-driven decision-making. Experienced in KPI tracking, exploratory data analysis, and stakeholder reporting.

TECHNICAL SKILLS

Languages & Tools: SQL, Python, Excel, Power BI, Pandas, NumPy

Core Skills: Data Cleaning, ETL, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, KPI Tracking, Statistical Analysis, Business Intelligence, and Stakeholder Reporting

Other: Data governance, data accuracy validation, pivot tables, VLOOKUP, conditional formatting, spreadsheet automation

WORK EXPERIENCE

Python Intern | AASVA Technologies India Pvt. Ltd.

Jan 2025 – Present

- Developed Python scripts using Pandas and NumPy to automate data cleaning tasks, reducing manual processing time by approximately 40%.
- Performed exploratory data analysis (EDA) on structured datasets to identify trends and support business reporting requirements.
- Cleaned, validated, and transformed raw data files to ensure data accuracy and consistency before downstream analysis.
- Collaborated with the analytics team to generate summary reports and data visualizations for stakeholder review.
- Wrote reusable Python functions for repetitive data extraction and transformation tasks, improving team productivity.

- Converted and migrated large volumes of structured data across formats, maintaining 99%+ accuracy in output records.
- Validated and reconciled data entries against source documents, identifying and correcting discrepancies to uphold data integrity.
- Processed and organized datasets using Excel—including pivot tables, VLOOKUP, and conditional formatting—for reporting purposes.
- Contributed to process documentation and quality checks to ensure consistent delivery standards across data conversion projects.

PROJECTS

Customer Shopping Behavior Analysis | Tools: SQL, Python, Power BI

github.com/dhanaanalyst21-ops

- Cleaned and transformed a 10,000+ row customer purchase dataset using SQL and Python (Pandas), resolving missing values, duplicates, and format inconsistencies.
- Performed EDA to uncover key shopping trends, top-selling categories, and seasonal purchasing patterns—driving 3 actionable business recommendations.
- Built an interactive Power BI dashboard with 6+ KPI visuals (sales by region, customer segments, and purchase frequency) enabling real-time business monitoring.
- Automated report generation with Python scripts, reducing reporting time from manual hours to under 5 minutes per cycle.
- Presented analysis findings to stakeholders with clear data storytelling, linking customer behavior metrics to revenue opportunities.

EDUCATION

M.sc Geography with Ancillary Statistics

M.V. Muthiah Govt. Arts College.

2019

Relevant Coursework: Statistical Analysis, Quantitative Methods, Data Interpretation, Research Methodology

CERTIFICATIONS

- Diploma in Python with Machine Learning (2022)
- Certification of Merit in Statistics
